BAS Digital Solutions

Fictional RFQ review packet

ILLUSTRATION ONLY | NO LIVE DOCUMENT PROCESSING

This example shows a possible handoff from RFQ intake to estimator review. It is not a customer case study, an actual system output, a commercial quotation, or a promise of feature availability.

Incoming message

“Please quote 40 mounting brackets, rev B, for November delivery. Let us know your price.”

Captured request details

Request ID	RFQ-EX-014
Customer	Sample Industrial Buyer (fictional)
Part	Mounting bracket
Quantity	40
Drawing revision	B (mentioned in email, file not provided)
Requested delivery	November (day not specified)
Quote deadline	Not provided
Intake source	Fictional customer email

Missing or unverified information

- Material specification not provided
- Drawing mentioned but not received or checked
- Dimensions / tolerances not provided
- Quote due date not provided
- Delivery destination not provided

Estimator review and next actions

- Verify the customer request and its revision
- Request missing drawing, material, tolerances and timing
- Confirm technical feasibility, manufacturing process and commercial terms
- Approve any final quotation manually. Nothing is sent by this example

Source traceability

- Quantity, part name and revision: customer email text
- Missing-item flags: checklist against agreed intake fields
- No drawing OCR, CAD interpretation or ERP integration is shown

What this example does NOT do

No automatic pricing, manufacturing cost calculation, drawing analysis, actual ERP posting, customer message, or guarantee of results is demonstrated. Capabilities for a paid pilot are assessed and agreed in writing.
